

VENDING MACHINE

fully automatic system

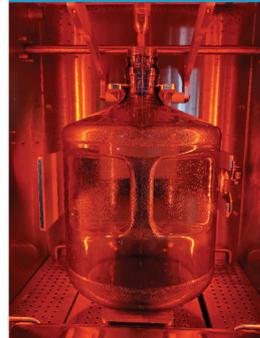

Why Water talk ?

1. Self-Cleaning

The bottle automatically rotates 180 degrees and cleaned with ozone water and clean water by the self-cleaning nozzle located at the bottom.

2. Automatic water filling

After completing a cleaning cycle, automatically returns to its default position for water filling.

3. Automatically push it out

After filling the bottle with water, the door automatically opens and pushes out the bottle.

4. Anti-Insect

LED light can prevent insects from entering the vending machine.

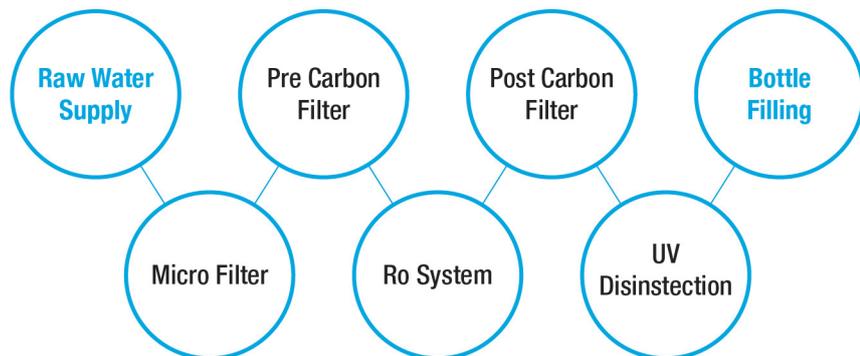

5. Sanitize the bottle cap

It is equipped with a UV sterilizer that can be sanitized by simply putting the bottle cap in the uv sterilization box during filling the bottle with water.

Fully automatic system

It is designed to keep the bottle clean as well as the water. Since it is fully automatic from washing the bottle to filling the water, it can be used in a very hygienic way.

Water Filtration System

Specification

Model	CJK-23M
Capacity	14m ² /day
Electricity (KWh)	2
Membrane	3
Electricity (KWh)	2
Salt Rejection	MIN / 99.5%
Color	WHITE
Dimension (L×W×H)	1,050 × 850 × 1,300

CJK Clean & Joyful in Korea
